

THE WEB PRODUCTION IT Products

TWP Online Publishing

The Web Production recognizes the need for Companies to keep Corporate Identity over geographically distributed subsidiaries.

TWP Online Publishing System is an internet application intended to automate corporate documents creating, searching, and publishing processes while keeping the corporate style.

The system is developed for employees of marketing, sales, and purchasing departments for companies with a wide branch network. It is also developed for partners and publishing houses. They get the access to the single repository of all corporate documents and templates:

- Presentations
- Brochures
- Flyers
- Posters
- Business cards
- Exhibitions materials
- Proposals
- User guides / Annotation / Technical descriptions / Application instructions
- Requests for the product orders
- Online requests for the printing

Advantages of TWP Online Publishing

- Fast and effective search of documents / certain information after various criteria
- Follows corporate style by using the corporate templates
- Convenient work with templates by means of intuitive web interface
- Quick and Efficient document updates
- Automated processes of documents creation and changes approval
- Time savings due to the acceleration of the work flows
