Who We Are

Our employees are qualified in the following fields:

Operating Systems

MS Windows 2000/NT/XP
Sun Solaris
Linux
FreeBSD

Database Systems

Oracle 8i/9i
MS SQL Server 7.0/2000
MySQL, PostgreSQL
MS Access

Application Servers

MS IIS 5.0
Apache,
IBM WebSphere,
Jserv
TomCat
BEA WebLogic
Oracle 9i AS
Macromedia JRun
Macromedia ColdFusion

Programming Languages

Java
C#, C++
Visual Basic
JavaScript
Lingo, ActiveScript
Perl

Technologies

JavaServlets, JSP
XML, XSLT
ASP, ASP.NET
Flash, Director
COM, COM+
CORBA, EJB
ColdFusion
PHP
UML, OOA/OOD

Who We Are

Our employees are qualified in the following fields:

95% of programmers have higher education in the field of computer science

100% of designers and animators have higher education in the field of art

80% of all employees have more than 1 year of working experience in related fields

50% of all employees have more than 3 years of working experience in related fields

30% of all employees have Microsoft, SUN, Oracle certificates

Our Solutions

In the solutions field we offer the following products:

Content Management Systems

Information Portals

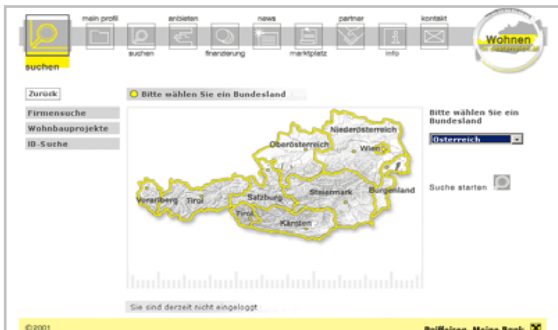

Customer Services & Support

Document Management Systems

Site Building Systems

Corporate Web Sites

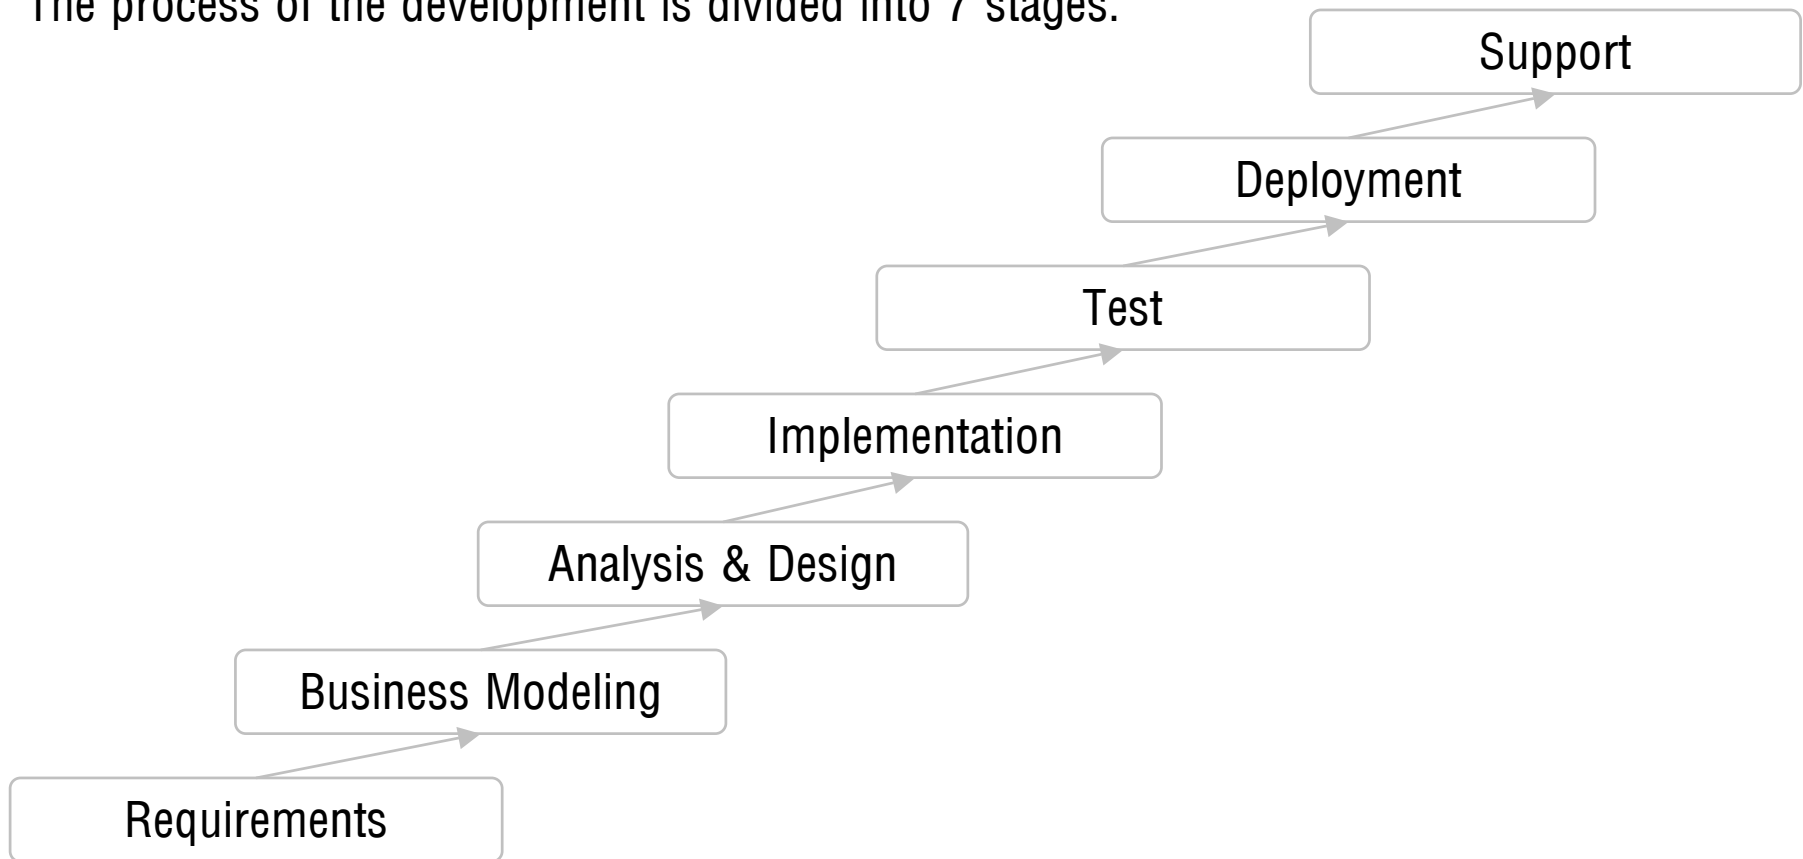

Transaction Platforms

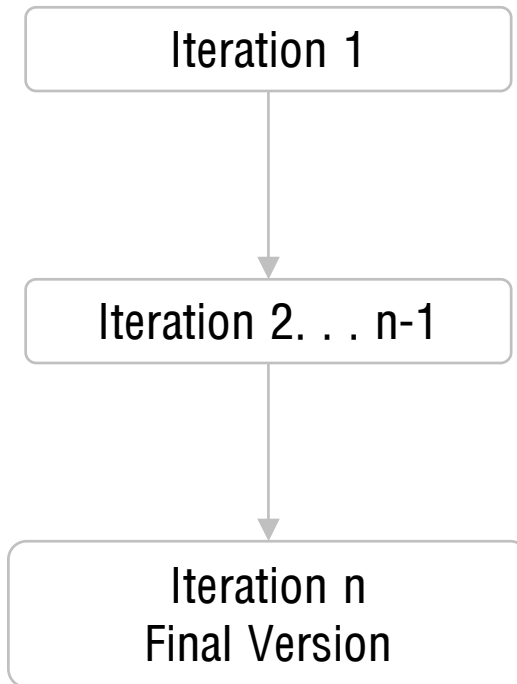

How We Work

The process of the development is divided into 7 stages:

- RUP
- XP

How We Work

We approach the project in such a way that the project development is divided into iterations.

The step-by-step development enables the adaptation of the project to the client demands as required.

Every iteration is planned along with the client. The client determines priorities in the realization of separate functions.

After every iteration the project is a complete functional system. That's why in case the project is held up the client's investment won't be lost.

After every iteration the quality assurance and testing of the project are carried out, then the project is published on the TWP server.

After the viewing over the system on the TWP server the client comments the system and asks to make changes if it's necessary.

The changes are included into the plan of the next iteration.

The final version is transferred onto the client's server.

After the project is completed we provide the system support and are always ready to answer all of your questions.

How We Work

Our **Quality Assurance** Team ensures a qualitative development of the project

A faultless project developing is achieved by efforts of 10 quality engineers

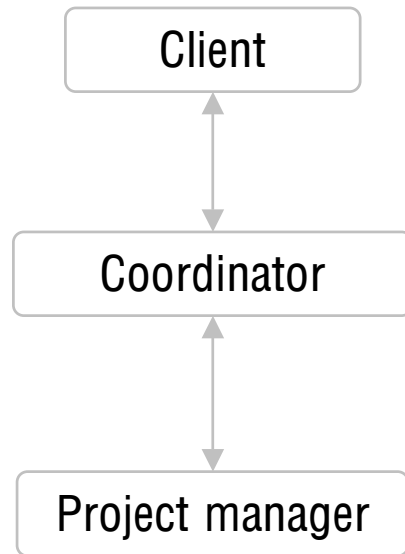

We consider Quality Assurance as one of the most important components of the project realization process: 30% of the project realization time is used for testing

The kinds of testing:

- Unit Testing
- Integration Testing
- Load Testing
- Stress Testing
- Usability Testing

How We Work

Our company works with the clients from all over the world.

Our professional and energetic Client Relations team makes it possible.

Each of our coordinators speaks several foreign languages.

The project managers maintain contacts with you through coordinators.

On request we will make the project versions in several European languages (English, German, French, Spanish, Italian and Dutch).

Accomplished projects

We have gained the experience in elaboration of the projects in the following areas:

- Real Estate
 - Raiffeisenbank Austria
- Insurance
 - Welke Financial Services, Union AG
- Banking
 - Dresdner Bank, Alpenbank, Eurohypo, Baltiyskiy Bank, Raiffeisenbank Austria
- Publishing
 - Tivola Publishing
- Mass Media
 - Strato Medien AG, Teles e-Commerce Track AG, Talkabout Communications GmbH
- Advertising
 - BMG Advertising, Spotdata

Content Management System

A lot of companies , already presented in internet, often deal with huge, constantly changing amounts of information. To keep your website up-to-date, we offer easy-to use multi-user Content Management Systems, that don't require professional IT knowledge from the user.

CMS characteristics:

- multiple levels of access for users of different categories
- content and structure of sites can be changed every time
- set of built-in models
- MS Word-like text editor
- built-in modules: search, statistics, registration, picture gallery and many more
- version control
- time-shifted publishing
- integrated system of news delivery
- release cycle
- archives

Information portals

In the field of the information portals developing we have realized projects for Raiffeisenbank, Lokalclick AG. „Wohnen in Österreich“ («to live in Austria») is an information portal that offers e-commerce services. The portal specializes in real estate, but can easily be adjusted to other services.

Wohnen in Österreich features:

- advanced search of real estate according to users' search criteria
- publishing of own objects to sell or to rent
- extended possibilities for partners
- mail engine that informs about new offers in real estate database according to clients' search criteria
- multiple access levels for users of different categories
- notification engine that informs the bank about potential clients
- built-in financial calculation forms
- news, announcement board, photo gallery of real estate objects

Customer Services & Support

Every company that has to deal with customers should deal with their requests quick and on a high professional level. This amount of requests can be considerably high so part of them may get unnoticed or even lost, which may lead to the loss of customer. These problems become critical in middle-sized and big companies.

To avoid the problems like this, we have developed a request tracker system for Dresdner Bank.

Request Tracker characteristics:

- automatic e-mail notification
- dynamic workflow
- dynamic request attributes
- request history
- multiple levels of access for users of different categories
- global search
- request knowledgebase
- report system with export to Excel

Document Distribution System

After a merger or restructuring of the companies the management has to face new tasks of document circulation: process coordination, uniformity of document styles and corporate design.

We have developed a Document Management System for a company EuroHypo, that was founded recently as a result of fusion of three financial institutions.

DMS characteristics:

- easy intuitive document catalog with categories
- support of various file types (word, excel, PDF, gif, jpg)
- document search
- password-protected access to the system
- bilingual, German/English, user interface
- document download/upload
- external documents ordering using the basket
- user and user group management (administrator)
- newsletter template management (administrator)
- file system (folders) management (administrator)

HOME SUCITE ANMELDEN

Kommunikationsdatenbank [comdat] der EUROHYPO

Hierich willkommen auf den Seiten der Eurohypo-Kommunikationsdatenbank, kurz Comdat.

Comdat ermöglicht Sie mit allen Bausteinen der Corporate Designs und darüber hinaus mit weiteren Marketingtools, wie z.B. Bild- und Dokumentdaten, die Sie für Ihr tägliches Arbeiten einsetzen können.

Diese Internet-basierte Datenbank wurde insbesondere für Mitarbeiter entwickelt, die keinen direkten Zugriff auf zentrale Speicherressourcen (und somit auch auf zentrale Vorlagen) und das Internet haben.

Für alle Mitarbeiter ist neu, dass eine zentrale Bilddatenbank zur Verfügung gestellt wird, in der sowohl Personen als auch Gebäude (Standorte, Referenzen) enthalten sind.

Hinweis: Sollten Sie über Bildrechte verfügen, die in die Datenbank aufgenommen werden sollen, sprechen Sie mit Herrn Bild, Marketing, Tel. +49 190 3 49 16 - 2 20 48

Hinweis: Für die Kollegen legen viele PC-Vorlagen in den entsprechenden Programmen vor 200 Word, PowerPoint, Excel, ... 3 Daten sind diese Vorlagen hier nicht abgelegt.

Wichtigste Ziel ist es, diese Datenbank weiterentwickeln bis zu 1:1-Marketing. Dies wird Ihnen in einem ersten Schritt ermöglichen, personalisierte Newsletter an Ihre Kunden zu versenden (via Brief, Fax oder Email).

Corporate Web Site

Effective company presentation on the Internet is a constituent part of today's success.

We have developed a lot of projects, among them are those for publishing house Tivola, hotel Angleterre and over 500 other famous companies.

Corporate Web Site can include the following features:

- 2 versions: static HTML and dynamic Flash
- built-in Content Management System
- multilevel navigation
- built-in online shop
- site statistics
- multilingual
- interactive functions: news, local weather, search, contact, forum, guestbook, chat, voting, quotations, exchange rates and many more
- system reports

Transaction Platforms

The tendency to shop via internet becomes more and more widely spread. We have developed the music online shop for BMG Advertising – Musicdownload 24. The project Musicdownload 24 was implemented as a dynamic flash site with content management system. It allows to manage the site content possessing minimum knowledge in IT .

The project Musicdownload 24 has the following features :

- search of products, catalog of the projects, basket for selected products
- the possibility to make an order
- registration in the system
- built-in modules: news, guestbook, chat and many more
- administrator has the right to manage the content of sites “news”, “most wanted” and to choose “the song of the week”, to renew the information about audio-clips based on the site, to hide/show audio-clips, to add music genres, artists, product groups, distribution canals and many more.

Flash presentations

A Flash presentation represents a great a tool for promotion of the company and other marketing purposes. It can be used for appearance in a conference, as a gift for customers and partners. The visual information about your company will be at disposal of interested persons at any moment. The presentation help you to attract potential customers and agents and to increase the awareness of the existing customers and agents.

Flash presentations can have following features :

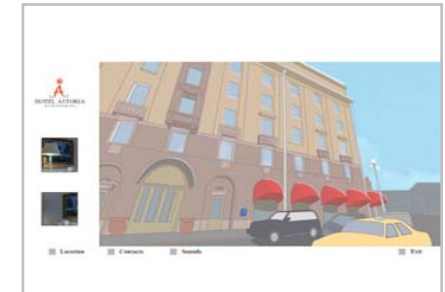

- build-in Virtual Tour
- multilingual
- interactive pages
- location in interactive land map with zoom
- appropriate sound
- usage of 3D objects
- development in Director and Flash

Human Resource Portal

HR Portal provides countless advantages to its users because it keeps all the HR-related information for planning, control and analyze. The clever rights distribution allows to assign access rights taking into account the hierarchy of the company.

The outstanding features of our HR Portal are

- the integration with Access control system Microprox – automatic work time checking. The system can be easily adjusted to another system with an open API.
- mobile phones support. If your mobile phone has the internet connection then you can load the HR Portal and scan the interesting information
- The list of HR Portal Modules:
 - Identification cards manager
 - Controller Manager
 - Employee Database
 - Schedule
 - Time Tracking
 - Task Management
 - Statistics
