

Mobile Games

Production Line

Mobile games hold a significant place in our company's activity. Our highly professional team of more than 75 animators, designers, developers and programmers develops dynamic and eye-catching games.

Modern technologies enable us to develop games with great multimedia content. Flash and Java technologies, which allow high quality bitmap and vector graphics, gave the foundation for developing mobile games of a new generation.

At present time mobile games are completely comparable by quality with PC games. They include beautiful 2D and 3D graphics, involved action, high program logic and great number of levels.

We develop both single- and multi-player mobile games of all genres: Arcade, Classic, Logic, Maze etc.

Crossing the Road

The game develops thinking and reaction skills and has over 10 levels, from the basic up to the most complicated.

You are to help a frog keep off all obstacles.

To cross the road you have to avoid bumping into obstacles and jump from one swimming object onto another.

The control is performed with a joystick.

Technical Details:

- Type: J2ME
- Sound: yes
- Highscore function: available upon request
- Supported phones: Nokia 7650, Nokia 3650, Nokia N-Gage, Siemens S/SL 55, Sharp GX10 and other
