

Mobile Games

Production Line

Mobile games hold a significant place in our company's activity. Our highly professional team of more than 75 animators, designers, developers and programmers develops dynamic and eye-catching games.

Modern technologies enable us to develop games with great multimedia content. Flash and Java technologies, which allow high quality bitmap and vector graphics, gave the foundation for developing mobile games of a new generation.

At present time mobile games are completely comparable by quality with PC games. They include beautiful 2D and 3D graphics, involved action, high program logic and great number of levels.

We develop both single- and multi-player mobile games of all genres: Arcade, Classic, Logic, Maze etc.

Love City

Your task is to climb up the labyrinth and to reach for the girl of your desire. There will be obstacles on your way, watch out and beware of the outrageous maiden. You have to avoid her or protect yourself with a condom you picked up earlier by pressing Enter key. After you've passed a level (and there's more than 5 of them) a charming girl will striptease only for you! The game is controlled with the joystick.
