

## Mobile Games

### Production Line

Mobile games hold a significant place in our company's activity. Our highly professional team of more than 75 animators, designers, developers and programmers develops dynamic and eye-catching games.

Modern technologies enable us to develop games with great multimedia content. Flash and Java technologies, which allow high quality bitmap and vector graphics, gave the foundation for developing mobile games of a new generation.

At present time mobile games are completely comparable by quality with PC games. They include beautiful 2D and 3D graphics, involved action, high program logic and great number of levels.

We develop both single- and multi-player mobile games of all genres: Arcade, Classic, Logic, Maze etc.

## Mars

In this game you have to protect the Earth power base and fight against Martians. You can move to the left and to the right.

Control either with the help of joystick or using the keyboard buttons.

This game has excellent animations, it was developed using GX library, produced by Microsoft, especially for game development and for fast graphic output.
