

Mobile Games

Production Line

Mobile games hold a significant place in our company activity. Our highly professional team of more than 75 animators, designers, developers, and programmers develops dynamic and eye-catching games.

Modern technologies enable us to develop games with great multimedia content. Flash and Java technologies, which allow high quality bitmap and vector graphics, gave the foundation for developing mobile games of a new generation.

New mobile games have the same facility as the CD Games; and realistic 3-D graphics – plane riding and car racing – is now available on mobile devices.

The entire diversity of mobile games is subdivided into the single- and multi-player games.

Volleyball

You say you like volleyball? Well, let's see how you can play our special The Peanuts volleyball. You control one little fellow – either Charlie or Snoopy. Your task is to prevent the ball from falling down on your side, just like in a real volleyball.

Your fellow runs back and forth, jumps up and kicks the ball. But don't get overexcited because you might drop the ball on your side and score yourself a goal. Have fun!

Technical Details:

- Type: J2ME
- Sound: yes
- High score function: available on request
- Supported phone: Nokia 7650, Nokia 3650, Nokia N-Gage, Siemens S/SL 55, Sharp GX10 and other
