

Mobile Games

Production Line

Mobile games hold a significant place in our company's activity. Our highly professional team of more than 75 animators, designers, developers and programmers develops dynamic and eye-catching games.

Modern technologies enable us to develop games with great multimedia content. Flash and Java technologies, which allow high quality bitmap and vector graphics, gave the foundation for developing mobile games of a new generation.

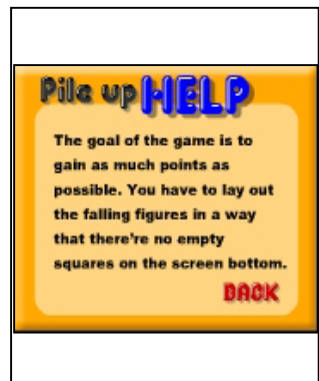

At present time mobile games are completely comparable by quality with PC games. They include beautiful 2D and 3D graphics, involved action, high program logic and great number of levels.

We develop both single- and multi-player mobile games of all genres: Arcade, Classic, Logic, Maze etc.

Pile up

Would you like to play Pile up - the tetris-like game famous all around the world –on your mobile phone? It's possible with a new mobile game from The Web Production! The goal of the game is to gain as much points as possible. You have to lay out the falling figures in a way that there're no empty squares on the screen bottom. When figures build a horizontal line, they are removed and you get points. The speed of the falling figures increases with every new level. To reach the last level, you have to pass several levels.

Have fun with the most fascinating game ever!
