

## Mobile Games

## Production Line

Mobile games hold a significant place in our company's activity. Our highly professional team of more than 75 animators, designers, developers and programmers develops dynamic and eye-catching games.

Modern technologies enable us to develop games with great multimedia content. Flash and Java technologies, which allow high quality bitmap and vector graphics, gave the foundation for developing mobile games of a new generation.

At present time mobile games are completely comparable by quality with PC games. They include beautiful 2D and 3D graphics, involved action, high program logic and great number of levels.

We develop both single- and multi-player mobile games of all genres: Arcade, Classic, Logic, Maze etc.

## Rescue Willi

Willi got lost in the beehive, and Maya has to find him and show the way out. Some rooms are blocked by the guard-bees, who let Maya in only if she has pollen of the certain colour. There are also cleaner-bees moving around the hive, if they catch Maya and force her to do their job, she's going to lose her precious time. The game is controlled with a joystick.

## Technical Details:

- Type: J2ME
- Sound: yes
- Highscore function: available upon request
- Supported phones: Nokia 7650, Nokia 3650, Nokia N-Gage, Siemens S/SL 55, Sharp GX10 and other
