

Mobile Games

Production Line

Mobile games hold a significant place in our company activity. Our highly professional team of more than 75 animators, designers, developers, and programmers develops dynamic and eye-catching games.

Modern technologies enable us to develop games with great multimedia content. Flash and Java technologies, which allow high quality bitmap and vector graphics, gave the foundation for developing mobile games of a new generation.

New mobile games have the same facility as the CD Games; and realistic 3-D graphics – plane riding and car racing – is now available on mobile devices.

The entire diversity of mobile games is subdivided into the single- and multi-player games.

Snoopy's Slalom

The goal of the game is to ski down the hill, avoiding different obstacles (such as stumps, snowmen).

Snoopy has three lives that he loses by running into the obstacles. The number of lives is shown in the top left-hand corner of the screen. The part of traversed path is displayed in the right hand corner.

The game has several levels.
