

## Mobile Games

## Production Line

Mobile games hold a significant place in our company's activity. Our highly professional team of more than 75 animators, designers, developers and programmers develops dynamic and eye-catching games.

Modern technologies enable us to develop games with great multimedia content. Flash and Java technologies, which allow high quality bitmap and vector graphics, gave the foundation for developing mobile games of a new generation.

At present time mobile games are completely comparable by quality with PC games. They include beautiful 2D and 3D graphics, involved action, high program logic and great number of levels.

We develop both single- and multi-player mobile games of all genres: Arcade, Classic, Logic, Maze etc.

## River Racer

The object of the game is to sail through the river full of thick swimming logs and rocks, which are sticking out, to pick up chests with gold, and to catch fish.

The game consists of several levels of difficulty. The higher the level, the more obstacles are placed in front of the player.

## Technical Details:

- Type: J2ME
- Sound: yes
- Highscore function: available on request
- Supported phones: Nokia 7650, Nokia 3650, Nokia N-Gage, Siemens S/SL 55, Sharp GX10 and other
