

Mobile Games

Production Line

Mobile games hold a significant place in our company's activity. Our highly professional team of more than 75 animators, designers, developers and programmers develops dynamic and eye-catching games.

Modern technologies enable us to develop games with great multimedia content. Flash and Java technologies, which allow high quality bitmap and vector graphics, gave the foundation for developing mobile games of a new generation.

At present time mobile games are completely comparable by quality with PC games. They include beautiful 2D and 3D graphics, involved action, high program logic and great number of levels.

We develop both single- and multi-player mobile games of all genres: Arcade, Classic, Logic, Maze etc.

Volleyball

You say you like volleyball? Well, let's see how you can play our special The Peanuts volleyball. You control one little fellow – either Charlie or Snoopy. Your task is to prevent the ball from falling down on your side, just like in a real volleyball.

Your fellow runs back and forth, jumps up and kicks the ball. But don't get overexcited because you might drop the ball on your side and score yourself a goal. Have fun!

Technical Details:

- Type: J2ME
- Sound: yes
- Highscore function: available on request
- Supported phones: Nokia 7650, Nokia 3650, Nokia N-Gage, Siemens S/SL 55, Sharp GX10 and other
